

# 2019-2020 City of Albion Budget Narrative

---

On September 10, 2019 the Albion City Council adopted a balanced budget for the twelfth year in a row. The following is a brief narrative summary of the City of Albion's fiscal system and budget considerations for the 2019-2020 fiscal year (October 1, 2019 – September 30, 2020).

---

## **Listing of Sources of Revenue and Significant Areas of Expenditure; Ranked in order of highest to lowest:**

### **Significant Sources of Revenue:**

- 1) Utility User Fees
- 2) Sales Tax
- 3) Property Tax
- 4) Business Occupation Tax

### **Significant Areas of Expenditure:**

- 1) Utility Departments & Reserves for future improvements
- 2) Capital Improvements: Streets, Parks/Camp Grounds, City Hall Parking
- 3) Operation Budget for Governmental Service Departments

Our projected sources of revenue continue to match up well with our projected expenditure bases.

Utility user fees finance the costs and reserves associated with the utility department operation and capital projects, including debt service for such projects.

Sales Tax revenues are used for capital projects, street improvements (including debt), water tower debt, swimming pool debt, and economic development.

Property Tax and Business Occupation Taxes are used to finance the operation budgets for all city governmental service departments such as administration, streets, park, pool, library, airport, police, and fire protection.

## **1) City Utilities & User Fees**

The largest expenditure base is in the city utility departments and their reserves for future improvements. In order to finance the expenditures (costs) incurred to provide utility services, the City of Albion uses a user fee system that generates revenue from users who gain benefit from utilization of the utility services provided by the city. The amount billed per customer is proportional to the use or benefit gained by the specific user. *Sewer rates are higher than water rates because the costs to pump clean water from the ground and deliver it to consumers are less than the costs associated with treating the water for re-introduction into the environment once it is returned to the city via the sewer collection system.*

Historically, the City of Albion has had utility rates among the lowest in the State of Nebraska. In the mid-2000's, the City leadership team acknowledged that costs to operate the utilities had outpaced revenues from such low user fees and that significant improvements to the City utility system were necessary. Originally, the City responded by incorporating incremental annual user fee increases based upon an economic indicator known as the CPI (Consumer Price Index). At the time, this system was recognized by the City Council as a financially responsible method of preparing for our community's future by keeping revenue increases at pace with the increasing costs associated with providing utility services.

In 2007, significant capital improvement needs of the sewer collection and wastewater treatment systems were identified. The costs associated with these projects were anticipated to go beyond normal inflationary cost increases and the City Council acted proactively by initiating a new progressive sewer rate escalation program as recommended by the NRWA (Nebraska Rural Water Association). This incremental rate increase program was adopted so that the City may be able to finance the needed future improvement projects. Several upgrades to the existing system have been made in recent years, the most significant of which is the new Waste Water Treatment facility, completed in 2013. We continue to reserve funds to prepare for future projects as they may become necessary.

In 2009, capital improvements to the water system were mandated by the state due to high levels of selenium in the drinking water. There have been no water rate increases as a direct result of a new well project that was completed to address the issue. The City water department is currently finishing a major capital improvement project to provide a backup water source to the water system which is being financed by State Revolving Loan Funds with 25% off the project cost in debt forgiveness. The City is also able to offset interest costs of the loan

with investment of Water Capital Reserve Funds – **the majority of which was derived from a transfer of Capital Improvement Sales Tax Funds, not water rates.**

All utility rates are reviewed annually in July/August. The Albion City Council considers information from the CPI, NRWA’s rate study and comparison, as well as any other information about the system that may indicate increasing costs to provide the utility services to the community. **The City Council elected to leave all utility rates unchanged for the 2019-2020 fiscal year.**

**In July of 2018 the Nebraska Rural Water Association provided the City with a survey of current water and sewer rates from what they determined to be an appropriate community peer group across the State of Nebraska. According to the data provided by NRWA, Albion’s 2019-20 water and sewer rates remain below average.**

**2) City Sales Tax & Uses**

Our City Sales Tax revenues have been providing employable reserves for capital improvements to the City’s infrastructure since 1998. Proceeds financed the 2000 water tower project, financed all 2008 street improvement projects with cash reserves, financed the 2008 fire hall construction project, allows for major fire equipment purchases, provided additional reserves for the 2013 Sewer plant construction project, provided reserves for the 2014 Albion Family Aquatic Center project, financed a 2014 Library improvement project, financed ballfield improvements to the Sport Complex in 2015 and 2018 as well as the 2016-17 multi-purpose sport court project, financed the 2016 Fairview Street Phase I Storm Sewer project and the 2017 Church Street Downtown Entrance project, and continues to finance the Albion Economic Development Program, which has successfully assisted commercial development in the community through demolition, loan security, recruitment, business façade improvement, Downtown Revitalization Planning, and other community economic development programs. The City of Albion has a positive retail pull factor which means that Albion is drawing in sales from other areas and that retail sales in Albion are higher than the state’s average per capita sales.

As of September 23<sup>rd</sup>, the Fiscal Year 2018-2019 sales tax revenues were \$682,619 (less 16,945 in State of Nebraska economic development incentive refunds): \$101,582 for the Swimming Pool Bonded Debt; \$60,950 for Fire Dept Building, Equipment, & Maintenance, \$20,316 for Police Dept Building, Equipment, & Maintenance; \$10,158 for City Hall Building & Maintenance; \$10,158 for Library Building & Maintenance; \$56,182 Motor Vehicle Sales Tax for the Street Department; \$304,746 for Public Works Capital Improvements; and \$101,582 allocated for the Albion Economic Development plan.

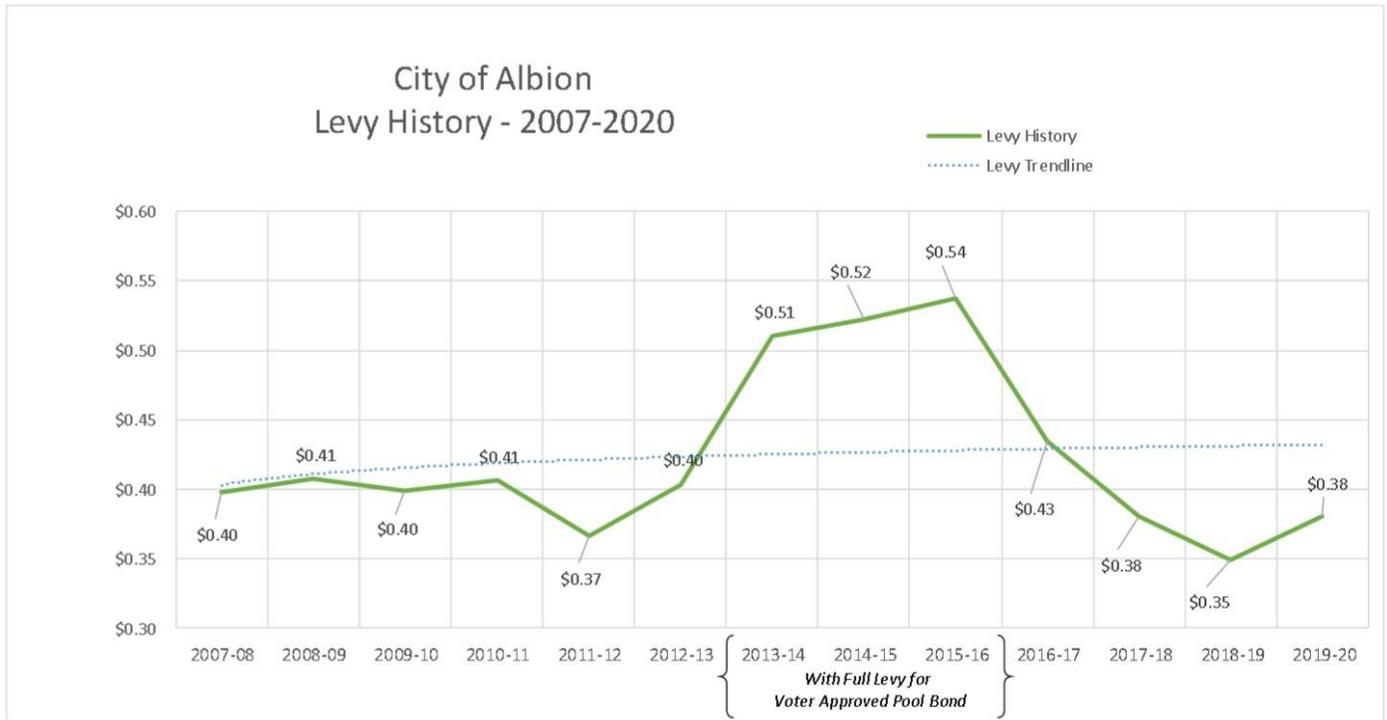

**3) City Property Taxes/Business Occupation Taxes**

Since the City of Albion has specific user fees to generate revenue to offset costs for utility services and Sales Tax Revenues are in place to finance other capital improvements and purchases, the City is able to focus property taxes and business occupation taxes to the operating budgets for Governmental Service Departments such as Administration, Streets, Parks, Pool, Library, Police, Debt Service and Fire Protection.

The 2019-20 operating property tax request, to be used for day-to-day operations of the governmental units listed in the above paragraph is \$488,450 and the total requested levy rate, which also includes property taxes required for bonded debt payments, for 2019-20 is \$0.3804 per \$100 valuation.

The following tables illustrate the property tax obligation for property of various values as well as recent levy history. These tax obligations fund the Streets, Park, Pool, Police, Fire Protection, Library, Administration – and also partial debt service of a voter approved Bond for construction of the new pool facility.

<b>Annual Property Owner Tax Obligation for City Services and Bonded Debt – 2019-20 Budget</b>					
<b>Property Value</b>	<b>\$ 100,000</b>	<b>\$ 150,000</b>	<b>\$ 250,000</b>	<b>\$ 300,000</b>	<b>\$ 350,000</b>
Annual Property Tax Obligation	\$ 380.40	570.60	\$ 951	\$ 1,141.2	\$ 1,331.40

**4) Summary of General Budgetary Issues**

The City conducts Community Attitude Surveys every five (5) years to establish a basis for public feedback and ratings of City facilities and services. Since 2011, those responses have been utilized in part to assist the City in establishing budget priorities and identifying potential Capital Improvement Projects. Respondents were asked to rate the City services as *Good, Fair/Average, or Poor*. The overall results for all government provided services on the 2016 survey results were *Good*.

The highest rated services were Fire and Rescue Services, Police Protection, Airport, and Garbage Services. The sales tax approval for Fire Construction and Equipment is greatly assisting in improving facilities and equipment for our fire department – an ambulance was purchased in 2010, a new pumper truck was purchased in the fall of 2011, a Grass Rig purchased in 2012, a Quick Response Rescue Truck was purchased in 2014, SCBA Air Tanks and a Crew-cab Pickup were purchased in 2015, a new SCBA fill station and additional air packs were purchased in 2016, a new training facility was purchased in 2017, in 2018 a new ambulance was purchased, in 2019 a new bin rescue facility was added to the training site. Planned equipment purchases include a new pumper fire truck in 2021.

Recreational facilities including the Parks, Sports Complex, Pool, and Library all received *Good* ratings in 2016 as well. Property taxes and transfers from administrative revenues fund the maintenance and operation of these facilities. In 2016, recreational trails were expressed as the highest recreation need for the community and in 2017 a community partnership including the City, County, Economic Development groups, and the Boone County Foundation Fund formed to help meet this need. A 1.8 mile trail project was initiated in 2017 and completed in fall of 2018. The Tennis Courts, and Public Restrooms were also exceptions that the public felt needed priority attention according to the 2011 and 2016 surveys. A multi-sport surface recreation project was completed in 2017. Improvements to the west ball fields were achieved in 2018 and a campground expansion project is planned for 2020. The City also plans to evaluate cost of addition of accessible play equipment in Fuller Park as well as new Sports Complex Light Poles for 2019-2020. The Library had foundation and masonry repair and electrical upgrades in 2013, had a basement improvement project in 2014-15, and completed a landscaping project 2017-18. The Library is looking into a project to make the original building basement into a usable space 2020-21.

In both 2011 and 2016 the lowest rating received for facilities/services was a *Fair/Average* rating for street conditions. In October 2012, the City completed a major maintenance project that included armor coating and/or sealing of all asphalt streets in Albion. In 2015-16, various areas were repaired, including some downtown curbing. 2015-16 Capital Projects included Ruby Street partial reconstruction, new construction of 8<sup>th</sup> and South Streets near the Albion Family Aquatic Center, and Phase I of the Fairview Storm Sewer Project which has been completed in the Fall of 2016. In 2017, a micro-surfacing maintenance project - similar but also superior to the 2012 armor-coating - to recondition all asphalt streets in town and the Church Street improvement project (Hwy 91 to 2<sup>nd</sup> Street) were both completed. Fairview Phase II Storm Sewer and Paving Improvement Project was completed in 2018. Routine maintenance, spot area patching, snow removal, and annual crack tarring were completed in 2019 and are also planned for 2020.

The comprehensive 2019-20 Capital Improvement Plan was approved by the City Council as part of the budget adoption process, includes a schedule of future Street Projects, and is available for review at the City Government page of the AlbionNE.com Website – see link below.

Other concerns raised in the 2011 and 2016 surveys about City facilities and services which impact the budget were: safe drinking water, storm water drainage; and code enforcement to clean up the appearance of the community. A City well project was completed in 2012 and producing safe, clean water for the community; however, the city is currently developing a backup production well expected to be online Fall of 2019. In 2015, a plan to take a phased approach to storm drainage projects was put into place and those projects are incorporated in the Capital Improvement Plan and first two phases are now complete. During the 2011-12 budget planning sessions it was decided to no longer contract code enforcement with Boone County. The subdivision, zoning, and building code responsibilities have all been absorbed by the City Clerk's office and nuisance abatement by the Police Department.

In conclusion, it continues to be exciting and encouraging for the City of Albion to have the opportunity to **1)** continue providing essential public services at or above acceptable levels, and **2)** realize significant progress in regards to Capital Improvements of various community facilities – while also maintaining a levy well below the state imposed limits. Although the process takes time and patience, the City and County economic development programs are positively impacting our citizens and our City budget. Positive economic impacts have directly resulted from such efforts and have provided the opportunity to adequately fund municipal services, maintain property tax rates at a secure level, and incorporate stable municipal financial planning for the future of our community.

Links to the completed State Budget forms, 2019-20 Capital Improvement Plan, City Sales Tax Information, and other public documents are available for review at: [www.AlbionNE.com/live/city-government/](http://www.AlbionNE.com/live/city-government/)

While citizens are encouraged to participate in budget workshops that are generally held in the summer months of July and August, the budget process requires consideration year round so please feel free to stop by City Hall to review budget documents at any time.

*Respectfully Submitted,*

Andrew L. Devine  
City Administrator/Clerk/Treasurer, City of Albion
